# Problem Statement

The purpose of this project is to Predict the volume traffic of the metro in Minneapolis state. In order to plan preventive maintenance for the metro and for advertisement purpose.

# Dataset description

Feature	Data type	Example
holiday	Categorical	US National holidays plus regional holiday, Minnesota State Fair (e.g., Columbus Day , None)
temp	Numeric	Average temp (in Kelvin e.g., 288, 289)
rain_1h	Numeric	Amount in mm of rain (raining per hour - e.g., 0,1)
snow_1h	Numeric	Amount in mm of snow (snowing per hour - e.g., 0,1)
clouds_all	Numeric	Percentage of cloud cover (e.g., 45, 1 )
weather_main	Categorical	Short textual description of the current weather (e.g. Clouds , clear)
weather_description	Categorical	Longer textual description of the current weather (e.g. sky is clear, few clouds)
date_time	DateTime	Date, Time and Hour of the data collected in local CST time (e.g., 2017-01-01 00:07:57)
traffic_volume	Numeric	Numeric Hourly I-94 ATR 301 reported westbound traffic volume (e.g., 6542,4516)

# Data Preparation

Data cleaning (e.g deleting outliers , drop null values)

One hot encoding for weather\_main column

Split date\_time into hour, day , month and year.

Convert holiday column into Boolean value

Creating day\_off column following the logical function:

$\text{off\_day\_column} = \text{Day} + \text{Holiday}$

Plot Correlation heatmap to find the features related with target.

# Feature selection

## Correlated features with target

day\_off

Temp

clouds\_all

Hour

day\_of\_week

First result for three models on test set.

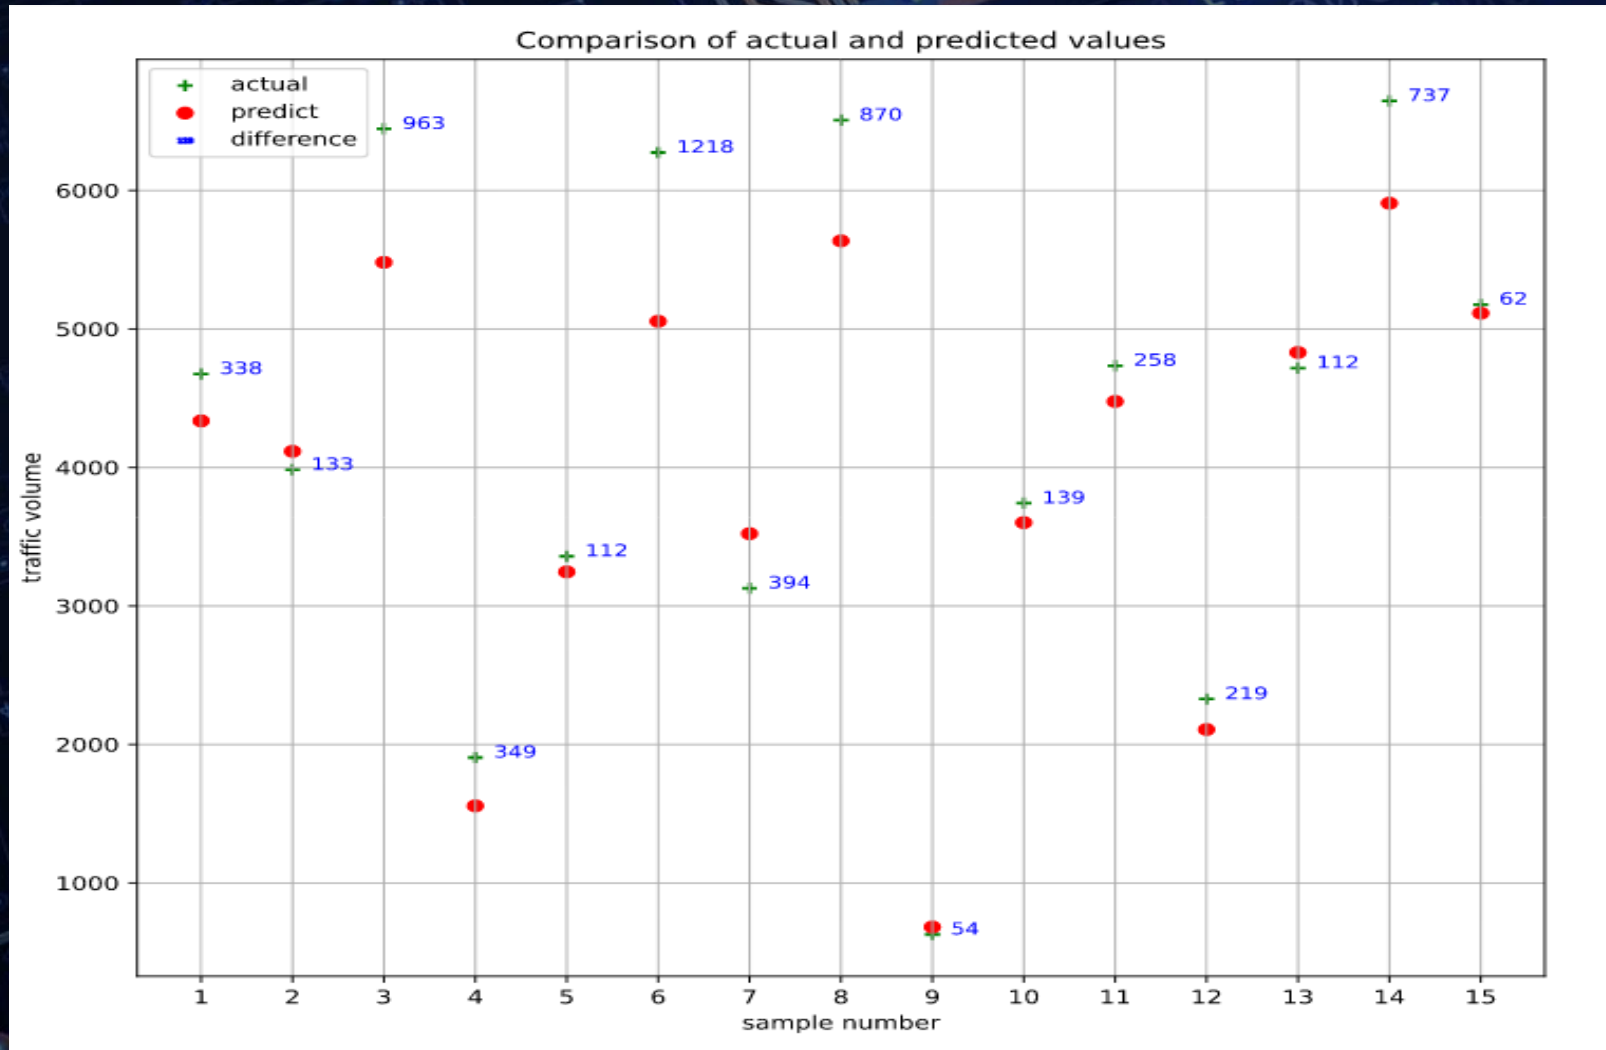

Model	R-square	MAE
Linear regression	18.2%	1583.8
Decision Tree Regressor	90.7%	389.46
Random forest Regressor	91.5%	363.98

# Result after tuning parameters

Model	R-square	MAE	Best estimator
Decision Tree Regressor	90.7%	389.46	('max_depth': 12, 'min_samples_leaf': 50)
Random forest Regressor	91.5%	363.98	{'max_depth': 12, 'min_samples_leaf': 10, 'n_estimators': 75}

# Visualization for the best models

A close-up, low-angle shot of a vinyl record spinning on a turntable. The record is dark blue or black, and the tonearm is visible on its surface. The background is dark with numerous out-of-focus, warm-toned circular lights (bokeh) in shades of orange, yellow, and gold, creating a nostalgic and artistic atmosphere. The text "Thanks For listening" is overlaid in white, sans-serif font on the left side of the image.

Thanks For listening
